CAREER OBJECTIVE

Third-year Computer Science student at El Shorouk Academy with hands-on experience developing software projects using Python and C#, alongside a strong foundation in C++ for problem solving and competitive programming. Has a strong foundation in Object-Oriented Programming and structured programming through academic projects and practical training, with additional experience building responsive web interfaces using HTML, CSS, and Bootstrap. A continuous learner committed to developing technical skills and gaining practical experience, with a career goal of starting as a React Front-End Developer, expanding into UI/UX, and gradually progressing toward becoming a Full-Stack Developer while building useful, user-friendly digital products that solve real-world problems.

EDUCATION

- **Bachelor's Degree in Computer Science** 2024 – 2028
- El Shorouk Academy

COURSES & CERTIFICATES

- **Python Programming – NTI | 2025**

Covered Python fundamentals including data types, control structures, functions, and basic problem-solving concepts.

- **C# Programming Workshop – IEEE | 2025**

Completed a C# programming workshop from IEEE El Shorouk Academy Student Branch focused on programming fundamentals and Object-Oriented Programming (OOP). Applied the learned concepts through the development of a Hospital Management System as a final project.

- **ECPC Participation Certificate | 2025**

Participated in competitive programming training and problem-solving practice as part of preparation for national-level contests.

SKILLS

TECHNICAL SKILLS

Languages: C++, C#, Python, C

Web Development: HTML5, CSS3, Bootstrap, Responsive Web Design

CS Fundamentals: Problem Solving with C++, Object-Oriented Programming (OOP), Data Structures

Tools: Git, GitHub, Visual Studio, VS Code

Languages: Arabic(Native), English(Intermediate)

SOFT SKILLS

Teamwork, Communication, Leadership, Adaptability

PROJECTS

- **Hospital Management System| Python | NTI Final Project**

[GitHub](#)

- Collaborated in a team to develop a console-based Hospital Management System using Python.
- Implemented modules for patient, doctor, nurse, pharmacy, appointment, billing, and emergency management.
- Applied Object-Oriented Programming (OOP) concepts and input validation techniques.
- Developed interactive menu-driven interfaces and organized the code into reusable and scalable functions.
- Technologies: Python, OOP

- **Hospital Management System| C# | IEEE Project**

[GitHub](#)

- C# Programming Course & Final Project
- IEEE – El Shorouk Academy Student Branch
- Completed a C# programming course focusing on programming fundamentals and Object Oriented programming (OOP) concepts.
- Developed a Hospital Management System as a final project to apply OOP principles in a real-world scenario.
- Implemented system modules for managing hospital data using a console-based application.
- Strengthened understanding of software design and structured programming using C#.

- **Simple Personal Portfolio Website**

[GitHub](#)

- HTML– CSS–Bootstrap–Responsive Web Design
- Application on the Web Programming course.
- Developed a responsive personal portfolio website to showcase personal information, technical skills, and projects.
- Built a multi-section layout including Home, About, Projects, and Contact sections using semantic HTML and Bootstrap framework.
- Implemented responsive design principles to ensure compatibility across different devices and screen sizes.
- Added interactive UI elements such as hover effects, smooth scrolling, and a contact form to enhance user experience.
- Integrated social media links (GitHub, LinkedIn, Email) for professional connectivity.

STUDENT ACTIVITIES

Enactus – PR & FR Member

El Shorouk Academy| 2026

DSC – PR & FR Member

El Shorouk Academy| 2025

Gained theoretical exposure to partnership development, stakeholder relationship management, sponsorship acquisition, branch representation, event organization, and basic financial and operational concepts.

HOBBIES

Reading, Chess, Playstation
